Volume Contents

NUMBER 1

Stéphane Lopes, J.-M. Petit and **Farouk Toumani**	1	Discovering interesting inclusion dependencies: application to logical database tuning
Geert Jan Bex, Sebastian Maneth and **Frank Neven**	21	A formal model for an expressive fragment of XSLT
K.K. Loo, Chi Lap Yip, Ben Kao and **David Cheung**	41	A lattice-based approach for I/O efficient association rule mining

NUMBER 2

Michael Rosemann and **Peter Green**	75	Developing a meta model for the Bunge–Wand–Weber ontological constructs
Eleni Tousidou, Panayiotis Bozanis and **Yannis Manolopoulos**	93	Signature-based structures for objects with set-valued attributes
Kam-Yiu Lam, Tei-Wei Kuo, Ben Kao, Tony S.H. Lee and **Reynold Cheng**	123	Evaluation of concurrency control strategies for mixed soft real-time database systems

NUMBER 3

Manos Theodorakis, Anastasia Analyti, Panos Constantopoulos and **Nicolas Spyratos**	151	A theory of contexts in information bases
Juliana Freire, Daniel Lieuwen and **Joann Ordille**	193	Integrating network devices in a meta-directory: the MetaComm experience

NUMBER 4

Xin Zhang and **Elke A. Rundensteiner**	219	Integrating the maintenance and synchronization of data warehouses using a cooperative framework
Mira Balaban and **Peretz Shoval**	245	MEER—An EER model enhanced with structure methods
Ming Xiong, Krithi Ramamritham, Jayant R. Haritsa and **John A. Stankovic**	277	MIRROR: a state-conscious concurrency control protocol for replicated real-time databases

NUMBER 5

Manolis Koubarakis and **Dimitris Plexousakis** 299 A formal framework for business process modelling and design

Filippo Furfaro, Sergio Greco, Sumit Ganguly and **Carlo Zaniolo** 321 Pushing extrema aggregates to optimize logic queries

Yen-Liang Chen, Shih-Sheng, Chen and **Ping-Yu Hsu** 345 Mining hybrid sequential patterns and sequential rules

NUMBER 6

Special Issue: The 13th International Conference on Advanced Information Systems Engineering (CAiSE ☆ 01)

Editorial
Klaus R. Dittrich and **Andreas Geppert** 363 Special Issue on advanced information systems engineering

Jaelson Castro, Manuel Kolp and **John Mylopoulos** 365 Towards requirements-driven information systems engineering: the *Tropos* project

Antoni Olivé and **Ernest Teniente** 391 Derived types and taxonomic constraints in conceptual modeling

Luís Filipe Andrade and **José Luiz Fiadeiro** 411 Agility through coordination

Martin Glinz, Stefan Berner and **Stefan Joos** 425 Object-oriented modeling with ADORA

Gerson Sunyé, Alain Le Guennec and **Jean-Marc Jézéquel** 445 Using UML Action Semantics for model execution and transformation

NUMBER 7

Barbara Oliboni and **Letizia Tanca** 459 A visual language should be easy to use: a step forward for XML-GL

Sonia Fernandes Silva, Tiziana Catarci and **Ulrich Schiel** 487 Formalizing visual interaction with historical databases

NUMBER 8

Zhexuan Song and **Nick Roussopoulos** 523 Using Hilbert curve in image storing and retrieving

Lei Zhu, Aibing Rao and **Aidong Zhang** 537 Advanced feature extraction for keyblock-based image retrieval

Wensheng Zhou, Son Dao and **C.-C. Jay Kuo** 559 On-line knowledge- and rule-based video classification system for video indexing and dissemination
